

splash™ 'n save

the secondary filtering system for pools

All **swimming pool** owners know how much water it takes to maintain a pool. With our **secondary filter system**, when you **clean** your pool or back wash your sand filter you can **re-direct** all that **water** back into your **pool clean!**

- reduce water consumption
- reduce cost of water bills
- save on chemicals
- can be installed on all new and existing sand filters.

NOTE It is important for all pool owners to have their water tested regularly at their local pool shop.

Chlorine + PH + TDS levels need to be maintained for a safe swimming environment.
